AUTHOR INDEX

VOLUME 25 NUMBERS 1–13

A

Abee, Christian R. See *Melchior et al.* 979
Abramowitz, Robert. See *Patton et al.* 189
Adams, Michael R. See *Clarkson et al.* 1629
Adolfs, M. J. P. See *Opmeer, Adolfs, and Bonta* 262
Ahrens, E. H., Jr. After 40 years of cholesterol-watching 1442
Akashi, Yoshio. See *Kihira et al.,* 1330
———. See *Yanagisawa et al.* 1263
Akeson, Ann, David W. Scupham, and **Judith A. K. Harmony.** The phosphatidylinositol response and proliferation of oxidative enzyme-activated human T lymphocytes: suppression by plasma lipoproteins 1195
Angelin, Bo, Kurt Einarsson, Lars Liljeqvist, Klas Nilsell, and **Renu A. Heller.** 3-Hydroxy-3-methylglutaryl coenzyme A reductase in human liver microsomes: active and inactive forms and cross-reactivity with antibody against rat liver enzyme 1159
Applegate, Kenneth. See *Chen et al.* 269
Ariga, Toshio, Robert K. Yu, and **Tadashi Miyatake.** Characterization of gangliosides by direct inlet chemical ionization mass spectrometry 1096
Assmann, G. See *Rosseneu et al.* 111

B

Bailey, J. Martyn. See *Low et al.* 1090
Baker, H. Nordean. See *Melchior et al.* 979
Balistreri, W. F., L. Zimmer, F. J. Suchy, and **K. E. Bove.** Bile salt sulfotransferase: alterations during maturation and non-inducibility during substrate ingestion 228
Banno, Yoshiko. See *Nakashima et al.* 219
Baraona, Enrique. See *Savolainen et al.* 813
Barnes, S. See *Hogan et al.* 791
Barrett, C. Redington. See *Liau et al.* 678
Barrowman, J. A. See *Laher et al.* 1337
Barua, Arun B., and **James A. Olson.** Synthesis of 4,4-difluoro analogs of retinol and retinoic acid 304
Batta, A. K. See *Dayal et al.* 865
Baudet, M. F., C. Dachet, M. Lasserre, O. Esteva, and **B. Jacotot.** Modification in the composition and metabolic properties of human low density and high density lipoproteins by different dietary fats 456
Behrens, Jerome C. See *Duane et al.* 523
Bell, A. L. Loomis. See *Liau et al.* 678
Bennett Clark, Susanne, and **Anne M. Tercyak.** Reduced cholesterol transmucosal transport in rats with inhibited mucosal acyl CoA cholesterol acyltransferase and normal pancreatic function 148
———. See *Gallo et al.* 604
Berman, M. See *Hall et al.* 1184
———. See *Wastney, Hall, and Berman* 160
Berr, Frieder, and **Fred Kern, Jr.** Plasma clearance of chylomicrons labeled with retinyl palmitate in healthy human subjects 805
Berry, Elliot M. See *Leibel et al.* 49
Björnsson, O. G. See *Gibbons, Pullinger, and Björnsson* 1358
Bokkenheuser, V. D. See *Winter et al.* 1124
Bolton, T. M. See *Hall et al.* 1184
Bolzano, K. See *Krempler et al.* 283
Bonta, I. L. See *Opmeer, Adolfs, and Bonta* 262
Bouhours, Danièle. See *Bouhours and Bouhours* 613
Bouhours, Jean-François, and **Danièle Bouhours.** Identification of free ceramide in human erythrocyte membrane 613
Bove, K. E. See *Balistreri et al.* 228
Braaten, J. T. See *Hall et al.* 1184
Brewer, H. Bryan, Jr. See *Gregg et al.* 1167
Brown, Michael S. See *Goldstein and Brown* 1450
Brown, W. Virgil. See *Le, Ginsberg, and Brown* 1387
Bryant, Robert W. See *Low et al.* 1090
Buckley, J. Thomas, Roger McLeod, and **Jiri Frohlich.** Action of a microbial glycerophospholipid:cholesterol acyltransferase on plasma from normal and LCAT-deficient subjects 913
Bugg, C. E. See *Hogan et al.* 791
Burczak, J. D., R. M. Soltysiak, and **C. C. Sweeley.** Regulation of membrane-bound enzymes of glycosphingolipid biosynthesis 1541
Bury, J. See *Vercaemst, Bury, and Rosseneu* 876
Byrne, Robert E. See *Scanu, Byrne, and Edelstein* 1593
———. See *Yamamoto et al.* 770

C

Camus, Marie-Claire. See *Forgez et al.* 954
Carew, Thomas E. See *Naruszewicz et al.* 1206
Carey, Martin C. See *Mazer and Carey* 932
Castro, Graciela R., and **Christopher J. Fielding.** Evidence for the distribution of apolipoprotein E between lipoprotein classes in human normocholesterolemic plasma and for the origin of unassociated apolipoprotein E (Lp-E) 58
Cernansky, Giselle. See *Liau et al.* 678
Chapman, M. John. See *Forgez et al.* 954
Chen, Chu, Kenneth Applegate, Weiling C. King, John A. Glomset, Kaare R. Norum, and **Egil Gjone.** A study of the small spherical high density lipoproteins of patients afflicted with familial lecithin:cholesterol acyltransferase deficiency 269
Chen, Tai C., James P. Mullen, and **Nancy J. Meglin.** Modulation of 1,25-dihydroxyvitamin D_3 receptor by phospholipids and fatty acids 1306
Chiku, S., K. Hamamura, and **T. Nakamura.** Novel urinary metabolite of d-δ-tocopherol in rats 40
Chun, Paul W. See *Patterson et al.* 763
Clarkson, Thomas B., Michael R. Adams, Jay R. Kaplan, and **Donald R. Koritnik.** Psychosocial and reproductive influences on plasma lipids, lipoproteins, and atherosclerosis in nonhuman primates 1629
Cohen, Bertram I. See *Singhal et al.* 539
———. See *Singhal et al.* 564
———. See *Une, Cohen, and Mosbach* 407
———. See *Winter et al.* 1124

Cole, Thomas G., and **David W. Gibson.** Evaluation of heat-sealed ultracentrifuge tubes in the isolation of plasma lipoproteins 312
———, **I. Kuisk, W. Patsch,** and **G. Schonfeld.** Effects of high cholesterol diets on rat plasma lipoproteins and lipoprotein-cell interactions 593
Comai, Karen. See *Hamilton and Comai* 1142
Cooper, Cynthia, L., and **Donald R. Lueking.** Localization and characterization of the *sn*-glycerol-3-phosphate acyltransferase in *Rhodopseudomonas sphaeroides* 1222
Cox, Jeffrey W. See *Farooqui et al.* 1555
Craven, B. M., and **Patricia Sawzik.** Conformational changes of cholesteryl palmitoleate in the crystal structure at low temperature 857
———. See *Sawzik and Craven* 851
Crawford, C. G., and **R. D. Plattner.** Phospholipid molecular species quantitation from mass spectra of underivatized lipids 518
Crossman, Michael W., and **Carlos B. Hirschberg.** Conversion of *erythro*-D-sphinganine to its [1-$^2H_1$] and [1-$^3H_1$] derivatives 729
Crouse, John R., and **Scott M. Grundy.** Effects of alcohol on plasma lipoproteins and cholesterol and triglyceride metabolism in man 486
Curtiss, Linda K. See *Steinbrecher et al.* 1109

D

Dachet, C. See *Baudet et al.* 456
Dadufalza, Violeta. D. See *Hollander, Dadufalza, and Sletten* 129
Dargar, Ratna. See *Nelson et al.* 821
Day, Richard C. See *Owen et al.* 919
Dayal, B., D. N. Greeley, T. H. Williams, G. S. Tint, and **G. Salen.** Stereospecific synthesis of 3β-hydroxylated bile alcohols 646
———, **G. Salen, G. S. Tint, A. K. Batta,** and **S. Shefer.** Synthesis of the putative metabolites of plant sterols: (24R)- and (24S)-24-methyl-5β-cholestane-3α,7α,12α,25-tetrols and 24-ethyl-5β-cholestane-3α,7α,12α,24ξ-tetrol 865
DeGasperi, Rita. See *Muhiudeen et al.* 1117
Demacker, Pierre N. M. See *Stalenhoef et al.* 1350
De Parscau, L., and **P. E. Fielding.** Lecithin:cholesterol acyltransferase and cholesteryl ester transfer activity from the isolated perfused rabbit liver 721
Dietschy, John M., and **David K. Spady.** Measurement of rates of cholesterol synthesis using tritiated water 1469
———. See *Stange and Dietschy* 703
Downing, Donald T. See *Wertz and Downing* 1320
Driscoll, Donna M., and **Godfrey S. Getz.** Extrahepatic synthesis of apolipoprotein E 1368
Duane, William C., Jerome C. Behrens, Susan Green Kelly, and **Allen S. Levine.** A method for measurement of nanogram quantities of 3-methylcholanthrene in stool samples 523

E

Ealick, S. E. See *Hogan et al.* 791
Edelstein, Celina, Ditta Pfaffinger, and **Angelo M. Scanu.** Advantages and limitations of density gradient ultracentrifugation in the fractionation of human serum lipoproteins: role of salts and sucrose 630
———. See *Scanu, Byrne, and Edelstein* 1593
———. See *Yamamoto et al.* 770
Eder, Howard A. History of the Journal of Lipid Research 1425
Egge, H. See *Schmitz et al.* 1102
Einarsson, Kurt. See *Angelin et al.* 1159
Eisenberg, Shlomo. High density lipoprotein metabolism 1017
———, **Yitzchak Oschry,** and **Joseph Zimmerman.** Intravascular metabolism of the cholesteryl ester moiety of rat plasma lipoproteins 121
Erickson, Sandra K. Report on the American Society of Biological Chemists Satellite Conference on Regulation of Intracellular Cholesterol Esterification 411
Esteva, O. See *Baudet et al.* 456
Evans, James E. See *Jungalwala et al.* 209
———. See *Jungalwala, Evans, and McCluer* 738
———. See *Kadowaki, Evans, and McCluer* 1132
Evans, R. W. See *Neufeld et al.* 288

F

Falko, James M. See *Patel et al.* 1072
Farooqui, Akhlaq A., W. Allen Taylor, Charles E. Pendley II, Jeffrey W. Cox, and **Lloyd A. Horrocks.** Spectrophotometric determination of lipases, lysophospholipases, and phospholipases 1555
Faust, Irving M. See *Miller, Faust, and Hirsch* 336
Field, F. Jeffrey. Intestinal cholesterol esterase: intracellular enzyme or contamination of cytosol by pancreatic enzymes? 389
Fielding, Christopher J. The origin and properties of free cholesterol potential gradients in plasma and their relation to atherogenesis 1624
———. See *Castro and Fielding* 58
Fielding, P. E. See *De Parscau and Fielding* 721
Finver-Sadowsky, Judith. See *Singhal et al.* 564
Fisher, Milton. See *Steinbrecher et al.* 1109
Fisher, Waldo R. See *Patterson et al.* 763
Flow, Bryan L., and **Glen E. Mott.** Relationship of high density lipoprotein cholesterol to cholesterol metabolism in the baboon (*Papio* sp.) 469
Forgez, Patricia, M. John Chapman, Stanley C. Rall, and **Marie-Claire Camus.** The lipid transport system in the mouse, *Mus musculus:* isolation and characterization of apolipoproteins B, A-I, A-II, and C-III 954
Frohlich, Jiri. See *Buckley, McLeod, and Frohlich* 913
Fukuda, Nobuhiro, and **Joseph A. Ontko.** Interactions between fatty acid synthesis, oxidation, and esterification in the production of triglyceride-rich lipoproteins by the liver 831
———. See *Wang, Fukuda, and Ontko* 571
Fukunishi, Ryo. See *Masuno et al.* 419

G

Galli, Giovanni. See *Sonnino et al.* 620
Gallo, Linda, L., Susanne Bennett Clark, Susan Myers, and **George V. Vahouny.** Cholesterol absorption in rat intestine: role of cholesterol esterase and acyl coenzyme A:cholesterol acyltransferase 604
Gargouri, Y., R. Julien, G. Pieroni, R. Verger, and **L. Sarda.** Studies on the inhibition of pancreatic and microbial lipases by soybean proteins 1214
Gazzotti, Giuliano. See *Sonnino et al.* 620
Getz, Godfrey S. See *Driscoll and Getz* 1368
———. See *Jones et al.* 319
———. See *Reardon et al.* 348

Ghidoni, Riccardo. See *Sonnino et al.* 620
Gibbons, G. F., C. R. Pullinger, and **O. G. Björnsson.** Changes in the sensitivity of lipogenesis in rat hepatocytes to hormones and precursors over the diurnal cycle and during longer-term starvation of donor animals 1358
Gibson, David W. See *Cole and Gibson* 312
Gidez, Lewis I. The lore of lipids 1430
Gil, Gregorio. See *Sitges, Gil, and Hegardt* 497
Ginsberg, Henry N. See *Le, Ginsberg, and Brown* 1387
Gjone, Egil. See *Chen et al.* 269
Glomset, John A. See *Chen et al.* 269
Goldberg, Charles S., Alan R. Tall, and **Steven Krumholz.** Acute inhibition of hepatic lipase and increase in plasma lipoproteins after alcohol intake 714
Goldberg, Ronald B. See *Jones et al.* 319
Goldfine, Howard. Bacterial membranes and lipid packing theory 1501
Goldstein, Joseph L., and **Michael S. Brown.** Progress in understanding the LDL receptor and HMG-CoA reductase, two membrane proteins that regulate the plasma cholesterol 1450
Goodall, Harry. See *Owen et al.* 919
Gordon, Jeffrey I. See *Reardon et al.* 348
Grace, D. Michael. See *Redinger, Hawkins,, and Grace* 428
Gray, Mary E. See *Swift et al.* 1
Greeley, D. N. See *Dayal et al.* 646
Greene, Dianne G. See *Mueller et al.* 383
Gregg, Richard E., Loren A. Zech, Ernst J. Schaefer, and **H. Bryan Brewer, Jr.** Apolipoprotein E metabolism in normolipoproteinemic human subjects 1167
Griffin, Robert G. See *Harbison and Griffin* 1140
Groot, Pieter H. E., and **Leo M. Scheek.** Effects of fat ingestion on high density lipoprotein profiles in human sera 684
Gruen, Rhoda K. See *Leibel et al.* 49
Grundy, Scott M. Pathogenesis of hyperlipoproteinemia 1611
———. See *Crouse and Grundy* 486
———. See *Kesäniemi and Grundy* 780
———. See *Vega and Grundy* 580
Gwynne, John T., Thomas Hughes, and **Barbara Hess.** Characterization of high density lipoprotein binding activity in rat adrenocortical cells 1059

H

Hall, S. E. H., M. E. Wastney, T. M. Bolton, J. T. Braaten, and **M. Berman.** Ketone body kinetics in humans: the effects of insulin-dependent diabetes, obesity, and starvation 1184
———. See *Wastney, Hall, and Berman* 160
Hallman, Mikko. See *Rauvala and Hallman* 1257
Hamamura, K. See *Chiku, Hamamura, and Nakamura* 40
Hamilton, James G., and **Karen Comai.** Separation of neutral lipids and free fatty acids by high-performance liquid chromatography using low wavelength ultraviolet detection 1142
Hanahan, Donald J., and **David R. Nelson.** Phospholipids as dynamic participants in biological processes 1528
———. See *Kumar et al.* 198
Hancock, Anthony J. See *Pajouhesh and Hancock* 294
———. See *Pajouhesh and Hancock* 310
Hara, Atsushi, Nobuko Kitazawa, and **Tamotsu Taketomi.** Abnormalities of glycosphingolipids in mucopolysaccharidosis Type III B 175
Harbison, Gerard S., and **Robert G. Griffin.** Improved method for the synthesis of phosphatidylcholines 1140
Harmony, Judith A. K. See *Akeson, Scupham, and Harmony* 1195
Harry, David S. See *Owen et al.* 919
Hartman, Arthur D. See *Krause and Hartman* 97
Harwood, H. James, Jr., Marita Schneider, and **Peter W. Stacpoole.** Measurement of human leukocyte microsomal HMG-CoA reductase activity 967
Havel, Richard J. The formation of LDL: mechanisms and regulation 1570
———. See *Jones et al.* 1151
———. See *Stoudemire et al.* 33
Hawkins, James W. See *Redinger, Hawkins, and Grace* 428
Hay, Rick V. See *Reardon et al.* 348
Hegardt, Fausto G. See *Sitges, Gil, and Hegardt* 497
Heller, Renu A. See *Angelin et al.* 1159
Hess, Barbara. See *Gwynne, Hughes, and Hess* 1059
Higashi, Shushi. See *Setoguchi et al.* 1246
Higgins, Joan A., and **Julie L. Hutson.** The roles of Golgi and endoplasmic reticulum in the synthesis and assembly of lipoprotein lipids in rat hepatocytes 1295
Higgins, T. J. Simplified fluorometric assay for sphingosine bases 1007
Hirabayashi, Yoshio. See *Muhiudeen et al.* 1117
Hirsch, Allen H., and **Ora M. Rosen.** Lipolytic stimulation modulates the subcellular distribution of hormone-sensitive lipase in 3T3-L1 cells 665
Hirsch, Jules. Research on adipose tissue and the first twenty-five years of the Journal of Lipid Research 1437
———. See *Leibel et al.* 49
———. See *Miller, Faust, and Hirsch* 336
Hirschberg, Carlos B. See *Crossman and Hirschberg* 729
Hofmann, Alan F., and **Aldo Roda.** Physicochemical properties of bile acids and their relationship to biological properties: an overview of the problem 1477
Hogan, Arthur, S. E. Ealick, C. E. Bugg, and **S. Barnes.** Aggregation patterns of bile salts: crystal structure of calcium cholate chloride heptahydrate 791
Holasek, Anton. See *Knipping et al.* 86
Holdeman, Lillian V. See *Sutherland et al.* 1084
Hollander, Daniel, Violeta D. Dadufalza, and **Eric G. Sletten.** Does essential fatty acid absorption change with aging? 129
Hoppens, Carol. See *Jackson et al.* 753
Hornick, Conrad. See *Jones et al.* 1151
Horrocks, Lloyd A. See *Farooqui et al.* 1555
Hoshita, Takahiko. See *Kihira et al.* 1330
———. See *Kihira, Kubota, and Hoshita* 871
———. See *Kuwabara et al.* 361
Hradek, Gary T. See *Jones et al.* 1151
Hughes, Thomas. See *Gwynne, Hughes, and Hess* 1059
Hutson, Julie L. See *Higgins and Hutson* 1295
Hylemon, Phillip B. See *Paone and Hylemon* 1343
———. See *Winter et al.* 1124

I

Ichimiya, Hitoshi. See *Yanagisawa et al.* 750
Ide, Takashi. See *Oku, Ide, and Sugano* 254
———. See *Sugano, Ryu, and Ide* 474
Igisu, Hideki, and **Kunihiko Suzuki.** Analysis of galactosylsphingosine (psychosine) in the brain 1000
Innerarity, Thomas L. See *Mahley et al.* 1277
Ishikawa, Yoshio. See *Uchida et al.* 236

J

Jackson, Evelyn M., Glen E. Mott, Carol Hoppens, Linda M. McManus, Susan T. Weintraub, Janet C. Ludwig, and **R. Neal Pinckard.** *High performance liquid chromatography of platelet-activating factors* 753

Jacotot, B. See *Baudet et al.* 456

Jayasimhulu, Koka. See *Kaneshiro, Matesic, and Jayasimhulu* 369

Jones, Albert L., Gary T. Hradek, Conrad Hornick, Guy Renaud, Eberhard E. T. Windler, and **Richard J. Havel.** Uptake and processing of remnants of chylomicrons and *very low density lipoproteins by rat liver* 1151

Jones, Leila A., Tamio Teramoto, Dawn J. Juhn, Ronald B. Goldberg, Arthur H. Rubenstein, and **Godfrey S. Getz.** *Characterization of lipoprotein produced by the perfused rhesus monkey liver* 319

Juhn, Dawn J. See *Jones et al.* 319

Julien, R. See *Gargouri et al.* 1214

Jungalwala, Firoze B., James E. Evans, Hiroki Kadowaki, and **Robert H. McCluer.** *High performance liquid chromatography–chemical ionization mass spectrometry of sphingoid bases using moving-belt interface* 209

———, **James E. Evans,** and **Robert H. McCluer.** Compositional and molecular species analysis of phospholipids by high performance liquid chromatography coupled with chemical ionization mass spectrometry 738

Jüngst, Dieter, Herbert Weiser, Elmar Siess, and **Hans J. Karl.** *Urinary cholesterol: its association with a macromolecular protein-lipid complex* 655

K

Kadowaki, Hiroko, James E. Evans, and **Robert H. McCluer.** Separation of brain monosialoganglioside molecular species by high-performance liquid chromatography 1132

———. See *Jungalwala et al.* 209

Kaneshiro, Edna S., Diane F. Matesic, and **Koka Jayasimhulu.** Characterizations of six ethanolamine sphingophospholipids from *Paramecium* cells and cilia 369

Kaplan, Jay R. See *Clarkson et al.* 1629

Kaplan, L. A. See *Katrangi, Kaplan, and Stein* 400

Kaplowitz, Neil. See *Sugiyama et al.* 1177

Karl, Hans J. See *Jüngst et al.* 655

Karlaganis, Georg, Verena Karlaganis, and **Jan Sjövall.** Identification of 27-nor-5β-cholestane-3α,7α,12α,24ζ,-25ζ,26-hexol and partial characterization of the bile alcohol profile in urine 693

Karlaganis, Verena. See *Karlaganis, Karlaganis, and Sjövall* 693

Katrangi, N., L. A. Kaplan, and **E. A. Stein.** Separation and quantitation of serum β-carotene and other carotenoids by high performance liquid chromatography 400

Katsuki, Taketo. See *Setoguchi et al.* 1246

Kaya, Kunimitsu, C. S. Ramesha, and **Guy A. Thompson, Jr.** *Temperature-induced changes in the hydroxy and nonhydroxy fatty acid-containing sphingolipids abundant in the surface membrane of Tetrahymena pyriformis* NT-1 68

Kelly, Susan Green. See *Duane et al.* 523

Kern, Fred, Jr. See *Berr and Kern* 805

Kesäniemi, Y. Antero, and **Scott M. Grundy.** Influence of probucol on cholesterol and lipoprotein metabolism in man 780

Kihira, Kenji, Yoshio Akashi, Syoji Kuroki, Jiro Yanagisawa, Fumio Nakayama, and **Takahiko Hoshita.** Bile salts of the coelacanth, *Latimeria chalumnae* 1330

———, **Akie Kubota,** and **Takahiko Hoshita.** Absolute configuration at carbon 23 of 5β-cholestane-3α,7α,12α,-23,25-pentol excreted by patients with cerebrotendinous xanthomatosis 871

———. See *Kuwabara et al.* 361

Kilgore, Laura L. See *Patterson et al.* 763

King, Weiling, C. See *Chen et al.* 269

Kirschner, Günther. See *Sonnino et al.* 620

Kitagawa, Teruo. See *Nakashima et al.* 219

Kitazawa, Nobuko. See *Hara, Kitazawa, and Taketomi* 175

Klein, Richard L., and **Donald B. Zilversmit.** Direct determination of human and rabbit apolipoprotein B selectively precipitated with butanol-isopropyl ether 1380

Knipping, Gabriele, Ernst Steyrer, Rudolf Zechner, and **Anton Holasek.** Isolation and characterization of polymorphic forms of porcine apoC-II by chromatofocusing 86

Koerner, Theodore A. W. See *Muhiudeen et al.* 1117

Koizumi, Junji. See *Wakasugi et al.* 246

Koritnik, Donald R. See *Clarkson et al.* 1629

Kortz, Warren J., Bruce D. Schirmer, Charles M. Mansbach II, Frank Shelburne, Marc R. Toglia, and **Steven H. Quarfordt.** Hepatic uptake of chylomicrons and triglyceride emulsions in rats fed diets of differing fat content 799

Kostner, G. M. See *Krempler et al.* 283

Krause, Brian R., and **Arthur D. Hartman.** Adipose tissue and cholesterol metabolism 97

Krempler, F., G. M. Kostner, A. Roscher, K. Bolzano, and **F. Sandhofer.** The interaction of human apoB-containing *lipoproteins with mouse peritoneal macrophages: a comparison of Lp(a) with LDL* 283

Krumholz, Steven. See *Goldberg, Tall, and Krumholz* 714

Kubota, Akie. See *Kihira, Kubota, and Hoshita* 871

Kuisk, I. See *Cole et al.* 593

Kumar, Raj, Susan T. Weintraub, Linda M. McManus, R. Neal Pinckard, and **Donald J. Hanahan.** A facile route to semi-synthesis of acetyl glycerylether phosphorylethanolamine and its choline analogue 198

Kuramoto, Taiju. See *Kuwabara et al.* 361

Kuroki, Syoji. See *Kihira et al.* 1330

Kuwabara, Miho, Tsuyoshi Ushiroguchi, Kenji Kihira, Taiju Kuramoto, and **Takahiko Hoshita.** Identification of bile alcohols in urine from healthy humans 361

L

Laher, J. M., M. W. Rigler, R. D. Vetter, J. A. Barrowman, and **J. S. Patton.** Similar bioavailability and lymphatic transport of benzo(a)pyrene when administered to rats in different amounts of dietary fat 1337

Landin, Britta, Åke Nilsson, Jer-Shung Twu, and **Michael C. Schotz.** A role for hepatic lipase in chylomicron and high density lipoprotein phospholipid metabolism 559

Lasserre, M. See *Baudet et al.* 456

Le, Nogc-Anh, Henry N. Ginsberg, and **W. Virgil Brown.** *Protocol for efficient plasma sampling for low density* lipoprotein turnover studies 1387

Ledeen, Robert W. Lipid metabolizing enzymes of myelin and their relation to the axon 1548

Lefevre, Michael, and **Paul S. Roheim.** Metabolism of apolipoprotein A-IV 1603

Leibel, Rudolph L., Jules Hirsch, Elliot M. Berry, and **Rhoda K. Gruen.** Radioisotopic method for the measurement of lipolysis in small samples of human adipose tissue 49

Lieber, Charles S. See *Savolainen et al.* 813
Lepage, Guy, and **Claude C. Roy.** Improved recovery of fatty acid through direct transesterification without prior extraction or purification 1391
LeQuire, Virgil S. See *Swift et al.* 1
Lester, Roger. See *St. Pyrek, Little, and Lester* 1324
Levine, Allen S. See *Duane et al.* 523
Li, Su-Chen. See *Muhiudeen et al.* 1117
Li, Yu-Teh. See *Muhiudeen et al.* 1117
Liau, Deng F., C. Redington Barrett, A. L. Loomis Bell, Giselle Cernansky, and **Stephen F. Ryan.** Diphosphatidylglycerol in experimental acute alveolar injury in the dog 678
Liljeqvist, Lars. See *Angelin et al.* 1159
Lindenbaum, Siegfried. See *Rajagopalan and Lindenbaum* 135
Lingwood, Clifford A. Production of glycolipid affinity matrices by use of heterobifunctional crosslinking agents 1010
Little, Joanna M. See *St. Pyrek, Little, and Lester* 1324
Low, Chow-Eng, Maureen B. Pupillo, Robert W. Bryant, and **J. Martyn Bailey.** Inhibition of phytohemagglutinin-induced lymphocyte mitogenesis by lipoxygenase metabolites of arachidonic acid: structure-activity relationships 1090
Ludwig, Janet C. See *Jackson et al.* 753
Lueking, Donald R. See *Cooper and Lueking* 1222
Lundberg, Bo, and **Liisa Suominen.** Preparation of biologically active analogs of serum low density lipoprotein 550

M

Mabuchi, Hiroshi. See *Wakasugi et al.* 246
Macdonald, Ian A. See *Sutherland et al.* 1084
Machulla, H. J. See *Schmitz et al.* 1102
Mack, S. E., and **F. B. St. C. Palmer.** Evidence for a specific phosphatidylinositol 4-phosphate phosphatase in human erythrocyte membranes 75
Maeda, M., H. Ohama, H. Takeda, M. Yabe, M. Nambu, and **T. Namihisa.** Identification of 3β,7β-dihydroxy-5β-cholan-24-oic acid in serum from patients treated with ursodeoxycholic acid 14
Mahley, Robert W., Thomas L. Innerarity, Stanley C. Rall, Jr., and **Karl H. Weisgraber.** Plasma lipoproteins: apolipoprotein structure and function 1277

SUBJECT INDEX

VOLUME 25 NUMBERS 1–13

A

ACAT: *see* **Acyl CoA:cholesterol acyltransferase**
Absorption
Of benzo(a)pyrene 1337
Of cholesterol in mice, effect of diosgenin and beta-sitosterol 236
Of cholesterol, role of ACAT 148
Of essential fatty acids in the rat, effect of age 129
Acetoacetate: Kinetics in humans 160, 1184
Acetyl glycerylether phosphoethanolamine: Facile route to semi-synthesis of 198
Acyl CoA:cholesterol acyltransferase
Activity in pigeon and monkey smooth muscle cells 903
Activity, in small intestine homogenates and microsomes 389
Role of regulation of cholesterol absorption 148
Role of in cholesterol absorption in rat intestine 604
Acylglycerol lipases: In porcine erythrocyte membranes 843
Acylglycerophosphate acyltransferase: In porcine erythrocyte membranes 843

CHD: *see* **Coronary heart disease**
CTX: *see* **Cerebrotendinous xanthomatosis**
Carcinogenesis: Cholesterogenesis in 1462
Carcinogens: 3-Methylcholanthrene, measurement of nanogram quantities in stools 523
Cardiac metabolism: Of ω-(*p*-iodo-phenyl)-pentadecanoic acid, a GLC–MS analysis 1102
Carotenoids: Serum, separation and quantitation by HPLC 400
Cell growth: Role of cholesterogenesis and isoprenoid synthesis in 1462
Cellular metabolism: Of LDL and HDL by fibroblasts, effect of dietary fat 456
Ceramide: Free, in human erythrocyte membranes 613
Ceramide-2-aminoethylphosphonate: In sphingolipids of *Tetrahymena pyriformis* 68
Cerebroside sulfate: Partition assay of 651
Cerebrotendinous xanthomatosis: Excretion of 5β-cholestane-3α,7α,12α,23,25 pentol 871
Chenodeoxycholic acid
And cholic acid, simultaneous determination of pool size and turnover 1313
Chemical synthesis of 7-methyl analogs of 407
Epimerization by human fecal microorganisms 1246
Formation of ursodeoxycholic acid from, by *Clostridium limosum* 1084
Cholelithiasis
Cholesterol, induction in the prairie dog 539
In the hamster, role of hydrophilic bile acids and sterols 564
5β-Cholestane pentol: Excretion in CTX, absolute configuration at carbon 23 871
Cholesterogenesis: Role in DNA replication and cell growth 1462
Cholesterol
In LDL of patients with CHD, comparison with apoB 580
Plasma, response to formula feeding 1442
Urinary, association with a macromolecular protein-lipid complex 655
Cholesterol absorption
In humans 1442
In mice, effect of diosgenin and beta-sitosterol 236
In the rat, effect of taurine-conjugated bile acids on 448
In the rat, role of ACAT 148
In the rat, role of cholesterol esterase and ACAT 604
Cholesterol esterase
Intestinal, pancreatic contaminant of intestinal cytosol 389
Role of in cholesterol absorption in rat intestine 604
Cholesterol esterification
Importance in absorption of exogenous cholesterol 604
Intracellular, regulation of, report on conference 411
Regulation by 25-hydroxycholesterol in a macrophage-like cell line 991
Cholesterol feeding: In hyper- and hyporesponding patas monkeys, characterization of HDL 979
Cholesterol, free: Potential gradients in plasma, relation to atherogenesis 1624
Cholesterol metabolism
And adipose tissue, a review 97
In humans, a 40-year overview 1442
In man, effect of alcohol consumption on 486
In pigeon smooth muscle cells lacking a functional LDL receptor 903
In the baboon, relationship to HDL cholesterol 169
In the baboon, two-pool model 469
In the rat, effect of dietary *cis*- and *trans*-octadecanoate 474
Cholesterol synthesis
In the rat, effect of aging 703
Regulation by 25-hydroxycholesterol in a macrophage-like cell line 991
Measurement of rate of, using tritiated water 1469
Cholesterol transport: Studied in the isolated perfused rabbit liver 721
Cholesteryl ester
Hydrolysis by microbial GCAT 913
Of rat plasma lipoproteins, intravascular metabolism of 121
Synthesis in isolated intestinal cells 389
Transfer activity in the isolated perfused rabbit liver 721
Cholesteryl nervonate: Crystals, conformation and packing of unsaturated chains 851

Cholesteryl palmitoleate: Crystals, conformational changes at low temperatures 857
Cholesteryl sulfate: Major polar lipid of horse hoof 1320
Cholic acid
And chenodeoxycholic acid, simultaneous determination of turnover 1313
Calcium salt, crystal structure of 791
Formation of ursocholic acid from, by *Clostridium limosum* 1084
Induction of 7-dehydroxylase and Δ^6 reductase by, in *Eubacterium* 1343
Chromatofocusing: Of porcine apoC-II 86
Chromatography, affinity: On heparin-Sepharose, of liver triglyceride lipase activity 419
Chromatography, gas–liquid
Analysis of fatty acids by direct transesterification 1391
And MS, detection of short chain bile acids in human serum 1324
And mass spectrometry, of serum bile acids 14
Chromatography, high performance liquid
And chemical ionization MS, of sphingoid bases 209
And mass spectrometry, molecular species analysis of phospholipids by 738
Isolation of human apoE by 876
Of 3-methylcholanthrene in stool samples 523
Of isomers of hydroxydocosahexaenoate 507
Of molecular species of gangliosides 620
Of neutral metabolites of vitamin A 638
Of platelet-activating factors 753
Separation and quantitation of serum β-carotene and carotenoids 400
Separation of molecular species of brain monosialoganglioside 1132
Separation of neutral lipids and free fatty acids by 1142
Chromatography, immunoaffinity: Of apoE 58
Chylomicron remnants
Estimation of plasma clearance in humans using retinyl palmitate 805
Uptake and processing of, by rat liver 1151
Chlyomicron(s)
Hepatic uptake of, in rats, effect of fat content of diet 799
Phospholipids, role of hepatic lipase in metabolism of 559
Clostridium "scindens": Mode of action of steroid desmolase and reductase 1124
Clostridium limosum: Formation of urso- and ursodeoxycholic acids by 1084
Co-translational processing: Of plasma apolipoproteins 1593
Coelacanth: *Latimeria chalumnae*, bile salts of 1330
Compound 58-035: Effect on cholesterol absorption in the rat 148
Coronary heart disease: Comparison of LDL apoB and cholesterol 580
Critical micellar concentration: Of glycosphingolipids in aqueous media 1233
Crosslinking agents: Production of glycolipid affinity matrices with 1010
Crystal structure
Of calcium cholate chloride heptahydrate 791
Of cholesteryl nervonate 851
Of cholesteryl palmitoleate 857
5α-Cyprinol: In coelacanth bile 1330

D

7-Dehydroxylase: In *Eubacterium* sp. VPI 12708, induction by cholic acid 1343
DNA replication: Role of cholesterogenesis and isoprenoid synthesis in 1462
DNA synthesis: In adult rat adipose tissue 336
Diabetes
Insulin-dependent, ketone body kinetics in 1184
Spontaneous in BB Wistar rats, serum lipids and lipoproteins 1072
Dietary cholesterol: Effect on plasma lipoproteins and lipoprotein-cell interactions 593
Dietary fat
Different amounts, effect of on absorption of benzo(a)pyrene 1337
Effect of on HDL profiles in human serum 684
Effect on composition and metabolic properties of human LDL and HDL 456
Influence of on hepatic uptake of chylomicrons and triglycerides 799
3,7-Dihydroxy bile acid epimers: Epimerization by human fecal microorganisms 1246
3β,7β-Dihydroxy-5β-cholanoic-24: In serum of patients treated with ursodeoxycholic acid 14
Diosgenin: Dietary, effect on biliary and fecal bile acids in mice 236
Diphosphatidylglycerol: In experimental acute alveolar injury in the dog 678
Diurnal cycle: Of lipogenesis, changes with hormones 1358
Docosahexaenoic acid: Autooxidation of 507

3-Methylcholanthrene: Measurement of nanogram quantities *in stool samples* 523
24-Methyl-5β-cholestane tetrols: Synthesis of, from cholic acid 865
Micelles
Mixed, of phosphatidylcholine and bile salts, kinetics of formation 135
Of glycosphingolipids in aqueous media, properties of 1233
Microbial lipase: *Inhibition of, by a soybean protein* 1214
Microsomal cholesterol: Modulation by nonspecific lipid transfer protein 27
Microsomes: Human liver, HMG-CoA reductase in, active and inactive forms 1159
Milk fat: *Dietary, effect of on composition and metabolism* of LDL and HDL 456
Molecular species
Of GM1 and GD1a gangliosides, by HPLC 620
Of phospholipids, analysis by HPLC and MS 738
Of phospholipids, quantitation by chemical ionization mass spectrometry 518
Monoclonal antibodies: Use of in study of evolution of LDL structure 821
Monosialoganglioside: Brain, molecular species, separation *by HPLC* 1132
Mouse: Apoproteins B, A-I, A-II, and C-III, isolation and *characterization* 954
Mucopolysaccharidosis: Abnormalities of glycosphingolipids *in* 175
Mucosal uptake: Of cholesterol in the rat, effect of taurine-conjugated bile acids 448
Mus musculus: Apoproteins B, A-I, A-II, and C-III, isolation and characterization 954
Muscle cells, smooth: Of pigeon, cholesterol metabolism in 903

Myelin: Lipid metabolizing enzymes of, relation to the axon 1548

N

Nephrosis, experimental: Lipoprotein metabolism in 1619
Neutral lipids: Separation by HPLC 1142
Neutrophils: Human, 1-O-alkyl-linked glycerophospholipids of 383
Neimann-Pick disease: Mouse model, tissue phospholipid and fatty acid composition 219
Nonhuman primates: Psychosocial and reproductive influences on plasma lipoproteins 1629

O

Obesity
Humans, ketone body kinetics in 1184
Influence of on biliary lipid secretion 932
Obesity, genetic: Zucker rat, mechanism of hypertriglyceridemia 571
***trans*-Octadecanoate:** Dietary, effect on cholesterol dynamics in the rat 474

P

Palm oil: Dietary, effect of on composition and metabolism of LDL and HDL 456
Pancreatic lipase: Inhibition of, by a soybean protein 1214
Paraglobosides: Accumulation in bronchoalveolar space in respiratory failure 1257
Paramecium tetraurelia: Ethanolamine sphingophospholipids in cells and cilia of 369
Partial ileal bypass: In WHHL rabbits, reduction of LDL production rate by 1350
Peanut oil: Dietary, effect of on composition and metabolism of LDL and HDL 456
Perfused liver: Rhesus monkey, characterization of lipoproteins produced by 319
Phosphatase: HMG-CoA reductase, partial purification from rat liver microsomes 497
Phosphatidic acid: Biosynthesis in *R. sphaeroides* 1222
Phosphatidylcholine
And bile salt micelles, kinetics, and thermodynamics of formation 135
Effect of composition on modulation of vitamin D receptor 1306
Improved method for synthesis 1140
Phosphatidylethanolamine: Cyclopentano-N-methyl, synthesis of 310
Phosphatidylinositol
Metabolism in human T lymphocytes 1195
Specific 4-phosphate phosphatase in human erythrocyte membranes 75
Phosphohydrolase: 4-phosphate, in human erythrocytes, specific for phosphatidylinositol 75
Phosphoinositide effect: Role of platelet-activating factor 1528
Phospholipases: A_1, A_2, and C, spectrophotometric determination of 1555
Phospholipid metabolism: Role of hepatic lipase 559
Phospholipid turnover: In lung, after acute experimental alveolar injury 678
Phospholipids
All-*trans*-cyclopentano-, synthesis of polar head group analogs 294
Biosynthesis in *R. sphaeroides* 1222
In a mouse model of Niemann-Pick disease 219
Modulation of vitamin D receptor by 1306
Quantitation of molecular species by mass spectrometry 518
Role of, in biological processes, a review 1528
Role of, in blood coagulation 1528
Phosphorylation: And dephosphorylation of HMG-CoA reductase 254
Physicochemical properties: Of bile acids, relationship to biological properties 1477
Phytohemagglutinin-induced lymphocyte mitogenesis: Inhibition by certain HETEs 1090
Plant lipids: Biosynthesis of 1508
Plant sterols: Synthesis of putative metabolites of 865
Plasma lipoproteins
Apolipoprotein structure and function 1277
Effect of alcohol intake on composition 714
In fed and fasted NZW rabbits 33
In humans, increase after alcohol intake 714
In man, effect of alcohol consumption on 486
In nonhuman primates, psychosocial and reproductive influences on 1629
Interactions with fibroblasts, effect of high cholesterol diet 593
Isolation of, using heat-sealed ultracentrifuge tubes 312
Rat, intravascular metabolism of cholesteryl esters of 121
Plasma membrane: Of rat adrenocortical cells, binding of HDL by 1059
Plasmalogen: Structure, discovery of 1522
Platelet: Membranes, arachidonoyl-CoA synthetase 288
Platelet-activating factor
As a chemical modulator 1528
HPLC of 753
Platelet-stimulating activity: Of acetyl glycerylether phosphoethanolamine and analogues 198
Polycyclic aromatic hydrocarbon: Absorption with dietary fat 1337
Polymorphism: Of porcine apoC-II 86
Post-translational processing: Of plasma apolipoproteins 1593
Prairie dog: Prevention of cholesterol-induced gallstones by hyodeoxycholic acid 539
Preproapolipoprotein(s): A-I and A-II 1586
Primates: ApoA-I of 879
Proapolipoprotein: A-I and A-II 1586
Probucol
Effect on LDL levels in the LDL receptor-deficient rabbit 1206
Influence of on cholesterol and lipoprotein metabolism in man 780
Treatment, effect on structure and metabolism of LDL 1206
Progesterone: Effect of on cholesterol esterification in macrophage-like cells 991
Propylthiouracil: And cholesterol, dietary, effect on composition of lipoproteins 593
Prostaglandin: PGE_2 receptors in peritoneal macrophages, regulation by fatty acids 262
Proteolipids: Urinary, association with cholesterol 655
Proteolysis: Of plasma apolipoproteins, at co- and post-translational level 1593
Provitamin A: Serum, specific assay of, by HPLC 400
Psychosine: Analysis in brain 1000

Psychosocial stress: Influence of on atherosclerosis and lipoproteins in nonhuman primate 1629

R

Radioisotopic method: For measurement of lipolysis in human adipose tissue 49
Receptor-mediated catabolism: Of LDL in fasted rabbits 33
Receptor-mediated endocytosis: Of lipoprotein remnants by rat liver 1151
Receptors
ApoB/E, role in metabolism of lipoproteins 1611
1,25-Dihydroxyvitamin D_3, modulation by phospholipids and fatty acid 1306
LDL, lack of in pigeon aortic smooth muscle cells 888, 903
PGE_2, in macrophages, regulation of in vivo by dietary fatty acids 262
Regulation
Of cholesterol metabolism in fibroblasts, by abnormal HDL 919
Of cholesterol metabolism in pigeon smooth muscle cells 903
Of cholesterol synthesis and esterification in macrophage-like cells 991
Of formation of low density lipoprotein 1570
Of membrane-bound enzymes of glycosphingolipid biosynthesis 1541
Of plasma cholesterol, a review 1450
Remnant lipoproteins: Uptake and processing of, by rat liver 1151
Respiratory failure: Accumulation of glycolipid in bronchoalveolar space 1257
Retinoic acid: Synthesis of 4,4-difluoro analogs of 304
Retinol: Synthesis of 4,4-difluoro analogs of 304
Retinyl esters: In rat tissues 638
Retinyl palmitate: In chylomicrons, plasma clearance of 805
Review article
Adipose tissue and cholesterol metabolism 97
Apolipoprotein structure and function 1277
High density lipoprotein metabolism 1017
Rhodopseudomonas sphaeroides
Localization and characterization of *sn*-glycerol-3-phosphate acyltransferase 1222
Phospholipid biosynthesis in 1222
mRNA Of apolipoprotein A-I 1586

S

Sequence analysis: Amino-terminal, of rat HDL apoE 348
Serine palmitoyltransferase: Rat brain, utilization of fatty acyl-CoA thioesters 185
Serum lipids
Composition in spontaneously diabetic rats 1072
In the Watanabe and the cholesterol-fed rabbit 246
Rat, effect of dietary *cis*- and *trans*-octadecenoate on 474
Serum lipoproteins: Fractionation by density gradient ultracentrifugation 630
β-Sitosterol: Dietary, effect on biliary and fecal bile acids in mice 236
Soybean proteins: Inhibition of pancreatic and microbial lipases by 1214
***erythro*-D-Sphinganine:** Deuterium- or tritium-labeled, synthesis of 729
Sphingoid bases
Biosynthesis of 1536
HPLC and chemical ionization MS of 209
Sphingolipids: *Tetrahymena pyriformis*, temperature-induced changes in 68
Sphingomyelin: Bovine brain, preparation of *erythro*-D-sphinganine from 729
Sphingophospholipids: Ethanolamine, from *Paramecium* cells and cilia 369
Sphingosine bases: Fluorometric assay of 1007
Sphingosine composition: Of brain, liver, and spleen glycosphingolipids in mucopolysaccharidosis 175
Starvation: In obese humans, ketone body kinetics 1184
Steroid balance: After cholesterol feeding, Letter to the Editor 527
Steroid desmolase: *Clostridium "scindens"*, mode of action 1124
Steroid reductases *Clostridium "scindens"*, mode of action 1124
Steroids, fecal: Effect of probucol on excretion of 780
Sterols: And bile acids, role of on cholelithiasis in the hamster 564
Structural studies: Of apoB complexes with Triton X-100 763
Subcellular distribution: Of hormone-sensitive lipase in 3T3-L1 cells 665
Sulfotransferase: Bile salt, effect of substrate ingestion on activity 228
Sunflower oil: Dietary, effect of on composition and metabolism of LDL and HDL 456

T

Tangier disease: Lipid binding properties of apoA-I and isoproteins 111
5-(Tetradecyloxy)-2-furoic acid: Effect of on fatty acid metabolism in the rat 831
***Tetrahymena pyriformis*:** Sphingolipids, temperature-induced changes in 68
d-δ-Tocopherol: Urinary metabolite of, in rats 40
TOFA: *see* **5-(Tetradecyloxy)-2-furoic acid**
Translation products: Of mRNA of apolipoproteins 1586
Triglyceride: Hepatic synthesis, in the baboon, during alcoholic liver injury 813
Trioleoylglycerol: Solubility of hydrophobic molecules in 189
Triton WR-1339: In vitro effect on canine HDL 770
Triton X-100: Formation of complexes with apoB 763
Turnover
Of LDL in WHHL and normal rabbits, effect of partial ileal bypass 1350
Of LDL, effect of probucol on 780
Of LDL, in the probucol-treated LDL receptor-deficient rabbit 1206
Of LDL, protocol for efficient plasma sampling for 1387
Of [^{3}H]cholesterol-labeled lipoproteins in the rat 121
Of apoLDL and apo-methyl-LDL in fed and fasted rabbits 33

U

Ultracentrifugation, density gradient
Of lipoproteins, advantages and limitations 630
Of serum lipoproteins, role of salts and sucrose 630

Ultracentrifuge tubes: Heat-sealed, evaluation in isolation of plasma lipoproteins 312
Unstirred water layer: Changes with age 129
Urinary excretion: Of bile alcohols, in healthy humans 361
Urinary metabolite: Of d-δ-tocopherol in rats 40
Urine
Analysis of bile acids in 750
Bile alcohol profile in 693
Ursocholic acid: Formation by *Clostridium limosum* 1084
Ursodeoxycholic acid
Chemical synthesis of 7-methyl analogs of 407
Epimerization by human fecal microorganisms 1246
Formation by *Clostridium limosum* 1084
Serum bile acids in patients treated with 14

V

VLDL: *see* **Very low density lipoprotein**
Very low density lipoprotein
Apolipoproteins, of the Watanabe and the cholesterol-fed rabbit 246
Direct determination of apoB in 1380
Metabolic consequences of overproduction 1611
Metabolism of apoE, in normolipoproteinemic humans 1167
Production in the perfused liver, inhibition by TOFA 831
Rat serum and intestinal Golgi, composition of 1
Very low density lipoprotein remnants: Uptake and processing, by rat liver 1151
Vitamin A: Metabolism, steady-state neutral metabolites in rat tissues 638
Vitamin D: Receptor, modulation by phospholipids and fatty acids 1306

W

Watanabe rabbit
Partial ileal bypass in, reduction of LDL production rate by 1350
Probucol-treated, metabolism of LDL in 1206
Serum lipid and lipoprotein composition 246

X

X-ray diffraction
Of calcium cholate chloride heptahydrate 791
Of cholesteryl nervonate crystals 851
Of cholesteryl palmitoleate crystals 857

Z

Zucker rat: Genetically obese, mechanism of hypertriglyceridemia in 571

NEW METHODS INDEX

VOLUME 25, NUMBERS 1, 3, 5, 7, 9, 11

Compiled by H. A. I. Newman

The numbers in this index refer to entry numbers in the New Methods listings which are found on the pages of Volume 25 given below.

Nos. 1–59, pp. 93–95,
Nos. 60–103, pp. 315–316
Nos. 104–154, pp. 534–536
Nos. 155–198, pp. 758–760
Nos. 199–239, pp. 1013–1014
Nos. 240–280, pp. 1272–1273

ENTRY NO.

N-Acetylneuraminic acid: GLC–mass spectrometry of 119
Adenylate cyclase platelet binding sites: Use of stable prostaglandins for 232
Aflatoxins
- Analogues as possible anticoagulants 1
- Biosynthetic intermediates, HPLC of 155
- Coupled column system for quantitating 60
- M_1, HPLC of 61

Apolipoproteins
- A-I
  - isoproteins determined in rabbit, rat, and human HDL by combining isoelectrofocusing and SDS-polyacrylamide gel electrophoresis 230
  - pro, identification in rat lymph and plasma 128
  - single radial immunodiffusion and SDS-polyacrylamide gel electrophoresis for quantitation of, from pooled human serum 231
  - turbidometric automated (COBAS-BIO) centrifugal assay for 229
- A-II
  - immunonephalometry of, in hyperlipoproteinemic serum 37
  - isoproteins of, isolation and characterization of human 135
- B, monoclonal antibodies for radioimmunoassay of, in CHD patients 134
- E
  - molecular sieve HPLC separation of, from human plasma VLDL 39
  - single gel phenotyping method 126
- HPLC of HDL 130
- VLDL, chromatofocusing of 265

Arachidonic acid metabolites
- HPLC of pentafluorobenzyl 161
- Pentafluorobenzyl ester preparation 161

Bile acids
- Cholan-24-oates, ^{18}O-methyl hydroxy-5β, synthesis of 204
- Chol-5-en-24-oate, methyl 3β-hydroxychol-, labeled with ^{13}C and ^{2}H 205
- Chromatorod separation and quantification of, from human bile 101
- Conjugated,
  - isotachophoresis separation of, detection by UV or conductivity 70
  - TLC separation from unconjugated, detection by spectrofluorimetry 108
- Excretion of, determined by analysis in single stool specimens 245
- HPLC with immobilized enzyme 163
- 1-Hydroxylated, synthesis of 244
- 12α-Hydroxy, bioluminescent assay for 248
- Metabolic profile of, in feces 107
- Methyl ester acetates, GLC with tauro-7α,12α-dihydroxy-5β-cholanic acid as an internal standard 105
- Mono-, di-, and tri- stereoisomers of, separation by capillary GLC 106
- Radioimmunoassay of, in tissue, bile, and urine 109
- Total 3α-hydroxy, bioluminescent assay of, with immobilized enzymes 164
- Unconjugated, TLC separation from conjugated, detection by spectrofluorimetry 108

Carotenoids
- Chromatography of, on magnesium oxide thin layers 13
- Hydroxymethyl-, synthesis of with vinyl anions 10

Chenodeoxycholic acid
- Labeled with deuterium 206
- Pool size in children determined by isotope dilution–mass spectrometry 246

Cholan-24-oates: ^{18}O-methyl hydroxy-5β, synthesis of 204

Cholanoic acids
- 3α,7α-Dihydroxy-7β-methyl-5β, synthesis of 207
- 3α,7β-Dihydroxy-7α-methyl-5β-, synthesis of 207
- 3α-Hydroxy-7ϵ-methyl-5β-, synthesis of 207

Chol-5-en-24-oate: Methyl 3β-hydroxychol-, labeled with ^{13}C and ^{2}H 205

Cholesterol
- Chromatorod separation and quantification of, from human bile 101

ENTRY NO.

Concentration and radioactivity determination in plasma 99
Determination in serum 278
Enzymatic assay of skin tissue 151
Free and total analysis, in bile 153
GLC of 179
HDL, comparison of three methods 152
25-Hydroxy, synthesis of with the cyclopropylcarbinyl rearrangement 112
Kinetic enzymatic automated method for 98
LDL cholesterol determination in blood serum after precipitation of LDL with polyvinylsulfate 264
Cholesteryl esters: GLC with silica Sep-Pak cartridges 103
Cholesteryl sulfate: GLC of from plasma and erythrocytes 58
Cholic acids
Amides and oxazolines, synthesis of 243
Chenodeoxy, labeled with deuterium 206
Deoxy amides and oxazolines, synthesis of 243
Hyodeoxy amides and oxazolines, synthesis of 243
Ursodeoxy
amides and oxazolines, synthesis of 243
labeled with deuterium 206
synthesis of, HPLC determination of precursor bile acids 247
Desmosterols: 7,8-Dihydro, synthesis of 59
Diethylstilbesterol: Deuterium labeling of 279
Dolichol monophosphate-mannose and -glucose: Separated by TLC 30
5,8,11-Eicosatrienoic acid: Synthesis of 180
Fats
Chloroform–methanol extraction of, from foods 76
Chloropropanediol fatty acid esters in Spanish cooking, isolation and identification 175
GLC on-line injection of, into capillary columns 171
Fatty acid choline esters: From trunkfish toxin, by GLC–chemical ionization–mass spectrometry 218
Fatty acid esters
Chloropropanedioyl, isolation and identification in adulterated Spanish cooking oils 175
Esterification methods to form 82
S-Methyl, synthesis from oleoyl CoA and *S*-adenosylmethionine 25
Xanthophyll, HPLC and Craig countercurrent separation of 17
Xanthophyll, mass spectrometric identification of 17
Fatty acid ethyl ester synthase: Partial purification and characterization of rabbit myocardial 209
Fatty acid methyl esters
Aqueous HCl-methanol preparation of 22
GLC of
on non-polar capillary columns 18
on SP 2340 capillary column 216
Rapid derivatization of, from fatty acids 174
Unsaturated, reversed-phase HPLC of fungal 172
Fatty acids
9-Aminophenanthrene-derivatized, HPLC with fluorometric detection of 177
C20 unsaturated by reversed-phase HPLC 173
GLC–mass spectrometry of algae 83
Hydroxy
GLC–mass spectrometric determination of 220
identification in psoriatic skin 79

ENTRY NO.

αHydroxy
preparation of 219
separated from nonhydroxy by fused-silica GLC 15
Long-chain, GLC of 179
Methylation of, for GLC 174
Octanoic, separated from thiooctanoic by GLC and HPLC 16
Short-chain
GLC of parts per trillion in air 20
GLC separation of, from phenols and indoles in feces and saliva 113
HPLC and electrokinetic detection 80
quarternary ammonium ion-pairs of, electrochemical detection 81
Trans, GLC of, on SP-2340 glass capillary columns 24
Fatty acid synthase: Purification from *Saccharomyces cerevisiae* 251
Fatty acid synthase thioester hydrolase: S-acyl, affinity purified with fatty acid synthase attached to Sepharose 210
Fatty alcohols: Separation of, by reversed phase HPLC 23
Free fatty acids: Long-chain, GLC micro method for, with menstral cycle serum 19
Galactosylceramide: Hydrogenation effect on enzymatic hydrolysis 32
Ganglioside antigens: HPTLC of, autoradiographic detection in 259
Gangliosides
Acetonitrile-HCl hydrolysis of, for HPLC of long chain bases 116
Oligosaccharides from, GLC–mass spectrometry of 188
Structural characterization of thymus 31
Trisialo, isolation and characterization 28
Glucosylceramide: Hydrogenation effect on enzymatic hydrolysis 32
Glycerol
Fluorimetric one-step procedure for plasma 114
Oxygen electrode amperimetric determination of 221
Glyceryl dioleates: TLC-flame ionization detection on boric acid-impregnated chromatorods 85
Glyceryl monooleates: TLC-flame ionization detection on boric acid-impregnated chromatorods 85
Glyceryl trioleates: TLC-flame ionization detection on boric acid-impregnated chromatorods 85
Glycolipids
Enzyme-linked immunoabsorbent assay for, with polystyrene beads and improved anti-glycolipid antibody 187
Isolation from blood elements 185
Neutral, HPLC of 118
Sulfo, peracetylated, determined by azure A 120
HETE: 15-, radioimmunoassay for 63
Hydrocarbons
Aromatic, polynuclear,
GLC and HPLC compared for analysis of 225
reversed-phase HPLC of, with electrochemical detection 227
vapor phase determination by laser-induced fluorescence 86
Petroleum, separated from water and mussels by steam distillation 226

ENTRY NO.

Hydroxyeicosatrienoic acid: HPLC separation of, from leukotrienes 159
Hydroxyvitamin-D: Competitive protein binding assay for blood serum 11
LCAT: Isolation of, without anti-apolipoprotein D 6
Leukotriene biosynthesis inhibitors: Synthesis of 66
Leukotrienes
B_4, conformational analysis of, based on high-field NMR 242
D_4, detection of, in the exudate of rat carrageenin-induced pleurisy 69
C_4
detection of, in the exudate of rat carrageenin-induced pleurisy 69
isolation from human seminal fluid 160
HPLC of, to separate from hydroxyeicosatrienoic acid metabolites 159
Total synthesis of conjugates dienals by 4-carbon homologation 52
Linoleate hydroperoxide isomerase: Purification and characterization of, from eggplant 5
Linoleic acid hydroperoxides: Isomerization of, under argon and degassed conditions 178
Lipases
Colipase influence on turbidimetric determination of pancreatic 250
Detection and determination of 75
Isolation of inhibitor of, from *Rhizopus microsporus* fungus 4
Lipid A
Acids determined in free, from *Actinobacillus actinomycetemcomitans* and *Haemophilus aphrophilus* 258
-Like compounds, laser desorption mass spectrometry of 224
Synthesis of two diphosphorylated derivatives of 124
TLC with enzyme-linked immunoabsorbant assay 184
Lipid-protein ratios: By infrared spectroscopy 191
Lipids
Densitometric quantitation of, on C18 TLC 36
Differential staining of N-acyl, on silica gel chromatograms 34
Extraction improved with lysostaphin treatment of staphylococcal cells 228
Fatty acid release from by simple hydrolysis procedure 122
Flame ionization detection of, with Iatroscan on chromarods 35
Fluorescence analysis of, for study of synthesis by mycelial fungi 263
HPLC–GLC of 262
Hydrazinolysis and fatty acid analysis of 121
Molecular species analysis with metastable ion mass spectrometry 189
Nile blue staining for demonstration of, with fluorescence 123
Normal-phase HPLC of microbial 87
Sulfophosphovanillin assay of, interference by azide 33
TLC with flame ionization to analyze complex mixtures of 192, 261
Three-directional TLC of 190
Lipolysis: Radioisotopic method for, in adipose tissue samples 252

ENTRY NO.

Lipopolysaccharides
Acids determined in whole, from *Actinobacillus actinomycetemcomitans* and *Haemophilus aphrophilus* 258
Detection in polyacrylamide gels by transfer to nitrocellulose followed by immunoradiography with antibody and ^{125}I-protein A 223
Silver stain detection of, in thick polyacrylamide gels 260
Lipoprotein lipases: Preparation of relatively stable partially purified beef heart 249
Lipoprotein receptors
Low density
characterization in rat corpus uteum 38
lipophilic fluorescein bound to LDL for the determination of, in human lymphocytes 131
High density, characterization in rat corpus luteum 38
Lipoproteins
Abnormal baboon, HPLC gel filtration separation of 266
Bovine, ultracentrifugation of, compared to gel filtration 129
Discontinuous density gradient ultracentrifugation of, from hypercholesterolemic patients 125
HDL
cholesterol, comparison of three methods 152
phosphatidylcholine, assay for 149
subfractions of rat, separation of, by density gradient ultracentrifugation 193
HPLC gel filtration separation of 127, 135, 266
LDL
cholesterol determination in blood serum after precipitation of LDL with polyvinylsulfate 264
HPLC gel filtration molecular weight determination 127
monoclonal antibodies to, for enhancing ^{125}I-labeled lipoprotein binding 132
radioimmunoassay of, with apoB in CHD patients 134
Lp(a), zone immunoelectrophoresis of 133
Ultracentrifugal micro method for labeled 89
VLDL, heparin-Sepharose subfractionation of 40
Liposomes
Diagnostic radiologic use of 267
Dioctadecyldimethylammonium chloride, compared to small sonicated vesicles 137
Photoreactivatable phospholipids in, for testing crosslinked products 42
Lipoteichoic acids
Isolation of, from *Streptomyces levoris* 186
Preparation of 29
Lipoxygenase-1: Optical and EPR study of interaction with 13-L-hydroperoxylinoleic acid 75
Membranes
Electron spin resonance of phosphatidylcholine-sulfatide model 138
Fluorescent probe detection of charge changes after protamine treatment 41
Ion tracer flux in, by absorption filtration 94
Lipid peroxidation effects on fluidity of 90
NMR,
carbon-13, study of spin-labeled cholesteryl ester 140
detection of cluster formation and phase separation in model 43
fluorine-19, for determination of acyl chain order 93
^{2}H, nitroxide probe conformations with 96

ENTRY NO.

Patchclamp pipettes for producing phospholipid bilayers from monolayers 91
Photoreactivatable phospholipids in, for testing crosslinked products 42
Plasma
high-voltage free flow electrophoresis preparation of rabbit PMN 139
purification and reconstitution of, with pore-forming protein from *Aeromonas salmonicida* 194
solubilization of proteases from rat liver 95
Polarized infrared study for orientation of melittin in lipid 97
Surface potential with an 8-anilino-1-naphthalene-sulphonate probe 195
Nileprost analogues: Radioimmunoassay for 201
Olefins: MS of Diels-Alder adducts for double bond position 21
Olean-12-en-28-oic acids: Substituted, separation from the corresponding urs-12-en-28-oic acid isomers 256
Oleic acid
Synthesis of deuterium-labeled 217
TLC–flame ionization detection on boric acid-impregnated chromatorods 85
Oleoyl PAF: Preparation of 45
Oligosaccharides: GLC–mass spectrometry of, from gangliosides 188
Pentadecanoic acid: ω-(*para*-^{123}I-iodophenyl), preparation and purification of 257
Phosphatidic acid
1,2-Dipalmatoyl, new synthesis of 148
New synthesis of bis(diacylglycero)phosphate 143
Phosphatidylcholines
Acetyl glycerylether, semisynthesis of 198
Amniotic fluid 150
Chiryl synthesis of dithiolester as a substrate for phospholipase A_2 165
Dipalmitoyl
differential thermal analysis and X-ray study of 196
deuterated, synthesis of from phosphatidic acid and deuterated choline 148
fast-atom-bombardment mass spectrometry of in amniotic fluid 46
Disaturated, single plate separation of lung 270
HDL, assay for 149
HPLC of molecular species of, application to human bile 141
Enzymatic colorimetry of in aqueous solutions 146
Isolation from lipid mixtures and infrared spectroscopy of 271
Lyso, HPLC of 47
Mass spectrometry of, by ammonia chemical ionization on a gold support 197
Mixed acid, synthesis of 47
NMR with ^{31}P and ^{2}H on, in liquid crystalline polyoxyethylene detergents 268
Polyunsaturated, synthesis and polymorphic phase behavior of 144
Stearoyllinoleoyl hydroperoxides of, HPLC of 275
Synthesis of ^{3}H acyl chain-labeled 238
Phosphatidylethanolamines
Acetyl glycerylether, semisynthesis of 198

ENTRY NO.

Polyunsaturated, synthesis and polymorphic phase behavior of 144
Synthesis of ^{3}H acyl chain-labeled 238
Phosphatidylglycerol: Enzymic colorimetric determination of, in amniotic fluid 234
Phosphatidylinositol: Isolation of, from soybean phospholipid 237
Phosphatidylinositol kinase: Identification of in rat liver lysosomes 71
Phosphatidylinositol-4-phosphate and -4,5-bisphosphate: Analysis of phosphate turnover with ^{32}P-lipids 236
Phosphodiesterase activities: Natural and artificial substrates for 3
Phospholipase A_2
Affinity column for 208
Chiryl synthesis of phosphatidylcholine dithiolester as a substrate for 165
Fluoroimmunoassay of human pancreatic 73
Purification and characterization of human pancreatic 7, 72
Radioimmunoassay for human pancreatic 7
Reversed-phase HPLC purification of rat spleen 211
Phospholipase B: Purification and properties of yeast membrane-bound 166
Phospholipase C: Characterization of a phosphatidylinositol specific 167
Phospholipase D: Micro-chromatographic test of transphosphatidylic activity of 8
Phospholipids
Acidic, TLC-densitometry of minor 274
Alkenylacylglycerol moieties of, GLC of 273
Amino, HPLC of succinimidyl 2-naphthoxyacetate fluorescent derivatives 142
Chromatorod separation and quantification of, from human bile 101
Dioleoyl, synthesis of deuterium-labeled 217
Glycerylether, preparation of oleyl-PAF, its enantiomer and analogs 45
HPLC
new isocratic method for 145
of human semen 147
Interactive calorimetric studies of, with gangliosides and myelin basic protein 239
Lung, single plate separation of 270
Methylated, HPLC of 44
Non-choline-containing, solubilization of divalent metals as a basis for a sensitive assay 269
Synthesis of with dimethyl-phosphoryl chloride 235
Phosphonolipids: Silicic column separation of amide AGEPC, amide AGEPE from other, and from phospholipids 272
Prostacyclin platelet binding sites: Use of stable prostaglandins for 232
Prostacyclins
5-Aza, synthesis of 67
HPLC of 68
Nileprost analogue of, radioimmunoassay for 201
Reaction of [4-t-butyldimethylsilyloxy-5-(3-t-butyldimethylsilyloxyoct-1-enyl)cyclopent-2-enyl] ethanal and cyclopentanone enolates as a key step in the synthesis of 240
Prostaglandin-H-convertases activity: Method for 2

ENTRY NO.

Prostaglandins
A_1, HPLC separation from B_1 and E_1 162
Aromatic analogues of, synthesis of 65
Aza, synthesis of 11-deoxy-8- 62
B_1, HPLC separation from A_1 and E_1 162
E_1, HPLC separation from A_1 and B_1 162
E_2, derivatization of for GLC–mass spectrometry of 199
E metabolites, radioimmunoassay of, for measurement of relative differences of phospholipase/prostaglandin synthetase activity 200
$F_{1\alpha}$, 6-keto,
HPLC and radioimmunoassay 202
separation and quantitation of radiolabeled 57
$F_{2\alpha}$, multiple ion analysis with a homologous internal standard 157
Fluorescent reagent determination of 203
GLC with selected ion monitoring 156
GLC–mass spectrometry or GLC–electron capture of 51
HPTLC of 56
Lactones, synthesis of 64
Radioimmunoassay of, from unextracted or extracted urine and serum 241
Separation and quantitation of radiolabeled 57
Synthesis of silyl nitronates for intermediates 53
Synthesis, omega side chain introduction 54
TLC (miniature) for 55
TLC of, cross-channel contamination of 50
Prostaglandin synthatase: Isolation and covalent structure of aspirin-modified active site of 253
Prostanoic acid: Oxa-13- synthesized from chiral cyclopropane compounds 104
Retinoids: HPLC gradient chromatography 168
Retinol
Chromatography of, reversed-phase nonaqueous 12
Fluorimetry of 12
Retinoyl fluoride: Preparation and characterization of 9
Rhodopsin: Purification and reassembly into lipid bilayers 233
Sphingoid bases
HPLC of
after acetonitrile-HCl hydrolysis of gangliosides 116
with mass spectrometry (chemical ionization) with a moving-belt interface 183
Reversed-phase HPLC of 115
Sphingolipids: Characterization of in spinach leaves 117
Sphingomyelin
Enzymatic colorimetry of in aqueous solutions 146
Isolation from lipid mixtures and infrared spectroscopy of 271
Steroid glucuronides and sulfates: Mass spectrometry of, by fast atom bombardment 213
Sterol metabolites: Isolation and characterization of 100
Sterols: Digitonin-precipitable as a cholesterol biosynthesis index 102
Steryl esters: Reversed-phase HPLC of 277
Surfactants: Mono- and dialanine, analysis by HPLC 154
Thromboxanes
B_2,
GLC–mass spectrometry or GLC–electron capture of 51
Radioimmunoassay of, from unextracted or extracted urine and serum 241
Reversed-phase HPLC of 158
GLC–selected ion monitoring of 156
HPLC and radioimmunoassay 202
Separation and quantitation of radiolabeled 57
Triglycerides
Amperometric determination of 221
Kinetic-regression assay of serum 27
Reversed-phase HPLC
influence of injection solvent on 222
quantitated by direct liquid inlet mass spectrometry 181
Stereospecific analysis of
plant 26
Glycine max, *Glycine soya*, *Avena sativa*, and *Avena sterilis* strains 182
Synthesis from 1,3-dibromopropan-2-ol 84
Ursodeoxycholic acid: Labeled with deuterium 206
Vesicles: Isolation of endosome-derived, from rat hepatocytes 92
Vitamin A
HPLC,
in the presence of vitamin E and antioxidants 110
reversed phase of, in fortified milk 170
separation of, from vitamin D in fortified milk 214
Vitamin D
HPLC
reversed and straight-phase column separations 215
reverse phase separation of, from vitamin A in fortified milk 170
separation of, from vitamin A in fortified milk 214
Vitamin D glucuronides: Mass spectrometry of, by fast atom bombardment 213
Vitamin D sulfates: mass spectrometry of, by fast atom bombardment 213
Vitamin D_2: Nonaqueous reverse phase HPLC of, with vitamin D_3 as internal standard 77
Vitamin D_3
24,25-Dihydroxy
chromatographic separation from 25-hydroxyvitamin D_3-26,23-lactone with cyano-bonded phase packing 111
serum sample Sep-Pak, HPLC purification before protein binding 78
(23*S*,25*R*)-25-Hydroxy-, 26,23-lactone isolation and identification of 254
Hydroxylated, separation by HPTLC 14
25-Hydroxypro, synthesis of with the cyclopropylcarbinyl rearrangement 112
Vitamin E: HPLC in the presence of vitamin A and antioxidants 110
Vitamin K_1
HPLC of, with electrochemical detection 212
HPLC reversed phase separation of and electrochemical reduction-fluorometric detection, comparison with UV and single or dual electrochemical detection 169
Voltammetric behavior of, at a glassy-carbon electrode 212
Wax esters, lipolysis of, TLC separation of products of 280

NOTICE

SECOND INTERNATIONAL CONGRESS ON ESSENTIAL FATTY ACIDS AND PROSTAGLANDINS

Egham, near London March 24–27, 1985

There will be multidisciplinary plenary sessions and poster presentations covering the major clinical, biochemical, nutritional, and epidemiological advances that have taken place since the first Congress in 1980. For further information, please write to the Essential Fatty Acids and Prostaglandins Congress Secretariat, % Zoological Society of London, London, NW1 4 RY, United Kingdom, from whom registration forms are available.
